TAKUMI When Precision Matters

Machine Specification

Travel	PV66	PV1052
X/Y/Z-axis	660 / 406 / 508mm	1060 / 520 / 610mm
Distance from spindle nose to table	102-610mm	115-725mm

Table

Dimension	762 x 406mm	1160 x 520mm
Max. load	500kg	650kg
T-slot (width x pitch x number)	18 x 100 x 3mm	18 x 100 x 5mm

Spindl

Spindle type [OP]	Direct drive
Spindle speed [OP]	12000rpm
Spindle motor power	7.5kW/15kW (Cont./S3-25%)
Spindle taper	BBT40

Feed

Rapid feed (X/Y/Z)	38/38/32m/min	32/32/32m/min
Cutting feed	12000m	nm/min
Motor power (X/Y/Z)	1.8/1.8/2.5kW	1.4/2.5/2.5kW

ATC & magazine

ATC type	Arı	m
Number of tools	20pcs	24pcs
Max. tool diameter	75/120mm	80/125mm
Max. tool length	240mm	300mm
Max. tool weight	7k	g

Supp

,		
Air pressure	6kgf/	′cm²
Electric power supply	25kVA	30kVA

Net Weial

Machine weight 2818kg 6200kg			
	Machine weight	2818kg	6200kg

^{*} The specifications and information may be changed without prior notice.

Standard & Optional

Standard:

12,000rpm, BBT40, direct drive spindle
20T (PV66) / 24T (PV1052)
Spindle air blast
Cutting air blast
Spindle oil cooler
Coolant tank & coolant flushing system
Full chip enclosure
Chip auger with lift up exhaust tube
3-Color signal light
Working light
Heat exchange for electric cabinet
Leveling block and screws
Maintenance tools
Manuals
Washing gun & air gun

Fanuc 0iMF-Plus Type 3, 10.4"

Washing gun & air gun
USB / Ethernet / RS-232C interface
Manual pulse generator
Automatic centralized lubrication system

Optional:

Mitsubishi M80A TypeA, 10.4"
Coolant through spindle 20bar
Chain type / scraper type chip disposal
(PV1052)
Workpiece measurement
Tool measurement
Oil skimmer
Oil mist collector
Oil mist cutting device
Transformer
CE certified

No.10, Gong 10th Rd., Dajia Distr., Taichung City 437, Taiwan

PV66 PV1052

The PV Series are designed for high rigidity, reliability and productivity, as demonstrated in both surface finish quality and consistent precision. The PV Series combines the highest removal with the best dynamics. It can handle a wide range of workpieces for all kind of applications.

Basic Structure

Ergonomic swivel operation panel

The operation panel can swivel 120°, and the height is designed to be at the operator's viewpoint.

High rigidity structure

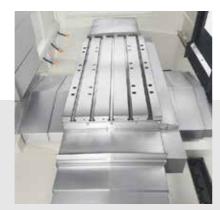

Bed, columns, saddle and other main castings are made of Meehanite grade cast iron and remove the internal stress by heat treatment to ensure the best structural stability and positioning accuracy.

The PV Series achieves high-rigidity and optimal machine structure by using FEM analysis from the design.

Hand scraping

Accuracy is ensured by hand scraped contact points. Contact surfaces such as column to base components, spindle cartridge to spindle housing, ball screw bearing block seats to bearing retainer and worktable to linear guide trucks and motor seat.

Hand scraping results in better mating surfaces of key components and will provide consistent results over a longer period of time.

Excellent chip removal

The sheet metal of the enclosure is designed with the proper slope to augment the high-volume programmable wash down, automating cleanup while saving valuable time for running parts.

Direct Spindle

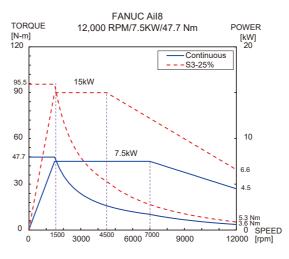

High speed direct drive spindle

The high-power direct drive spindle limits vibration, noise and power loss during high speed rotations to achieve superior part finish.

Stable spindle cooling circulation

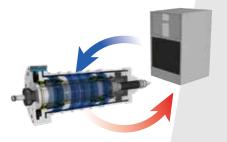

Spindle temperature is constantly controlled by oil chiller. Our test result have proven that the temperature of the circulating oil is controlled within certain variation, which minimizes thermal displacement during continuous operation at high speed.

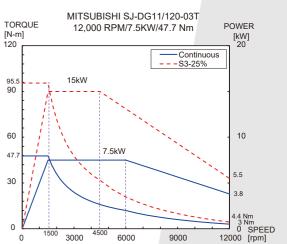

12,000rpm Direct drive spindle (w/o CTS)

7.5/15 kW Power (Cont./S3-25%)

47.7/95.5 N.m Torque (Cont./S3-25%)

12,000rpm Direct drive spindle (w/o CTS)

7.5/15 kW Power (Cont./S3-25%)

47.7/95.5 N.m Torque (Cont./S3-25%)

Wide Machining Area

Maximum working area (L x W x H)

PV66	660 x 406 x 508mm
PV1052	1060 x 520 x 610mm

Maximum workpiece weight

PV66	500kg
PV1052	650kg
